PROFESSIONAL SUMMARY

AI-focused Computer Science undergraduate with strong foundations in C++, Data Structures, and Object-Oriented Programming. Experienced in building automation tools including a Desktop AI Assistant and Expense Tracking System. Passionate about developing intelligent software solutions and solving real-world problems.

TECHNICAL SKILLS

- Programming Languages: C++, Python, C
- Core CS: Data Structures & Algorithms, OOP, DBMS (Basic), Operating Systems (Basic)
- Concepts: STL, File Handling, System Calls, String Processing
- Tools: Git, GitHub, VS Code

PROJECTS

- **Desktop AI Assistant (C++)**: Developed a voice/text-based assistant to launch applications and websites. Implemented command recognition using string parsing and system calls to automate routine tasks.
- **Smart Expense Tracker System (C++)**: Built a console-based financial tracking system with file handling for persistent storage. Applied OOP and STL containers for dynamic data management and reporting.

HACKATHON EXPERIENCE

Participant – Smart India Hackathon 2025 (National Level): Collaborated in a team-based problem-solving environment and contributed to solution design.

LEADERSHIP & ACTIVITIES

Volunteer – NCQC 2025 (College Level): Assisted in coordination, logistics, and smooth event execution.

EDUCATION

B.Tech – Computer Science Engineering (Artificial Intelligence), GL Bajaj Institute of Technology and Management (2024 – Present)
